

AI Scribe

Ambient AI that listens at the chair, drafts structured clinical notes, and writes them into your PMS.

VENDOR <input type="text"/>	DEMO DATE <input type="text"/>	WHO YOU SPOKE WITH <input type="text"/>

WHAT TO ASK ON A DEMO

TICK WHAT THEY SAY · NOTE · N/A

<p>01 Does the note post directly into the patient chart, or is it copy-paste? Doesn't apply <input type="checkbox"/></p> <p>True write-back is where most time savings live; copy-paste eliminates the value.</p> <p> <input type="checkbox"/> Auto-posts <input type="checkbox"/> One-click copy <input type="checkbox"/> Copy-paste </p> <p>NOTES <input type="text"/></p>
<p>02 Is the AI dental-native — perio probing, tooth numbering, CDT codes? Doesn't apply <input type="checkbox"/></p> <p>Generic medical scribes misfire on dental terminology and add editing work instead of removing it.</p> <p> <input type="checkbox"/> Dental-native <input type="checkbox"/> Dental-adapted <input type="checkbox"/> General healthcare </p> <p>NOTES <input type="text"/></p>
<p>03 Is audio retained after transcription, and is it used to train their models? Doesn't apply <input type="checkbox"/></p> <p>Patient audio is PHI; practices must know retention location, duration, and training use.</p> <p> <input type="checkbox"/> Deleted after <input type="checkbox"/> Retained <input type="checkbox"/> Used for training </p> <p>NOTES <input type="text"/></p>
<p>04 What is the patient consent workflow, and what happens if a patient declines? Doesn't apply <input type="checkbox"/></p> <p>Most states require recording consent; vendors should supply a compliant workflow, not leave it to you.</p> <p> <input type="checkbox"/> Vendor-provided <input type="checkbox"/> Practice-designed <input type="checkbox"/> No guidance </p> <p>NOTES <input type="text"/></p>
<p>05 Who approves the note before it posts, and who is liable for AI errors? Doesn't apply <input type="checkbox"/></p> <p>Auto-posting without required provider approval is a liability risk for clinical and billing errors.</p> <p> <input type="checkbox"/> Provider approves <input type="checkbox"/> Auto-posts <input type="checkbox"/> Configurable </p> <p>NOTES <input type="text"/></p>

06 **Show me: how long to review and finalize a note after a crown prep?**

Doesn't apply

Time-to-finalize is the ROI metric — a 3-min saving vs. 12-min saving is a different business case.

- Under 2 min
- 2–5 min
- 5+ min

NOTES

07 **What is the pricing structure and what does the contract commit you to?**

Doesn't apply

Cancellation terms and data export rights are critical for a tool this embedded in daily workflow.

- Monthly
- Annual
- Per encounter
- Bundled

NOTES

08 **What does onboarding look like and how long until a provider is proficient?**

Doesn't apply

A 6-week setup adds real disruption cost; the best tools go live in days and ramp in 2–3 weeks.

- Self-serve
- Guided
- Full implementation

NOTES

09 **What is the support model and the fallback when the tool goes offline mid-day?**

Doesn't apply

A scribe that fails with no backup turns a productivity tool into a scheduling crisis.

- Live phone/chat
- Ticket/email
- 24/7 support

NOTES

10 **Can they provide a peer reference from a practice your size on the same PMS?**

Doesn't apply

Peer references reveal real-operatory accuracy that clean marketing demos never show.

- Yes, matched
- Yes, different setup
- None

NOTES

YOU'VE EXPLORED 1 OF 24 CATEGORIES

Imagine the rest of your practice running this clearly.

You sized up one category today. The other 23 — staffing, no-shows, insurance, slow collections — are already sorted, each vendor **classified by the problem it solves.**

EVERY PROBLEM IN YOUR PRACTICE, ALREADY SORTED

Clinical AI	Imaging	Practice Mgmt	Patient Comms	Insurance	Revenue Cycle
Payments	Membership	Credentialing	Scheduling	Marketing	Analytics
AI Scribe	Teledentistry	Phone / VoIP	Virtual Assts	Staffing	HR & Training
Treatment Plan	Engagement	Supplies	Lab	Hardware	Compliance

500+ vendors · sorted by the problem, vetted by our editors
